# DAVIS

Data Visualization and Integration Shell

Mirco Franco & Lars Schneider

# Problem - CLI

- Shell:
  - *Parsing user's input correctly*
  - *Executing desired command*
- Embed Gnuplot & LaTeX
- Userfriendly & practical

# Solution - Executor

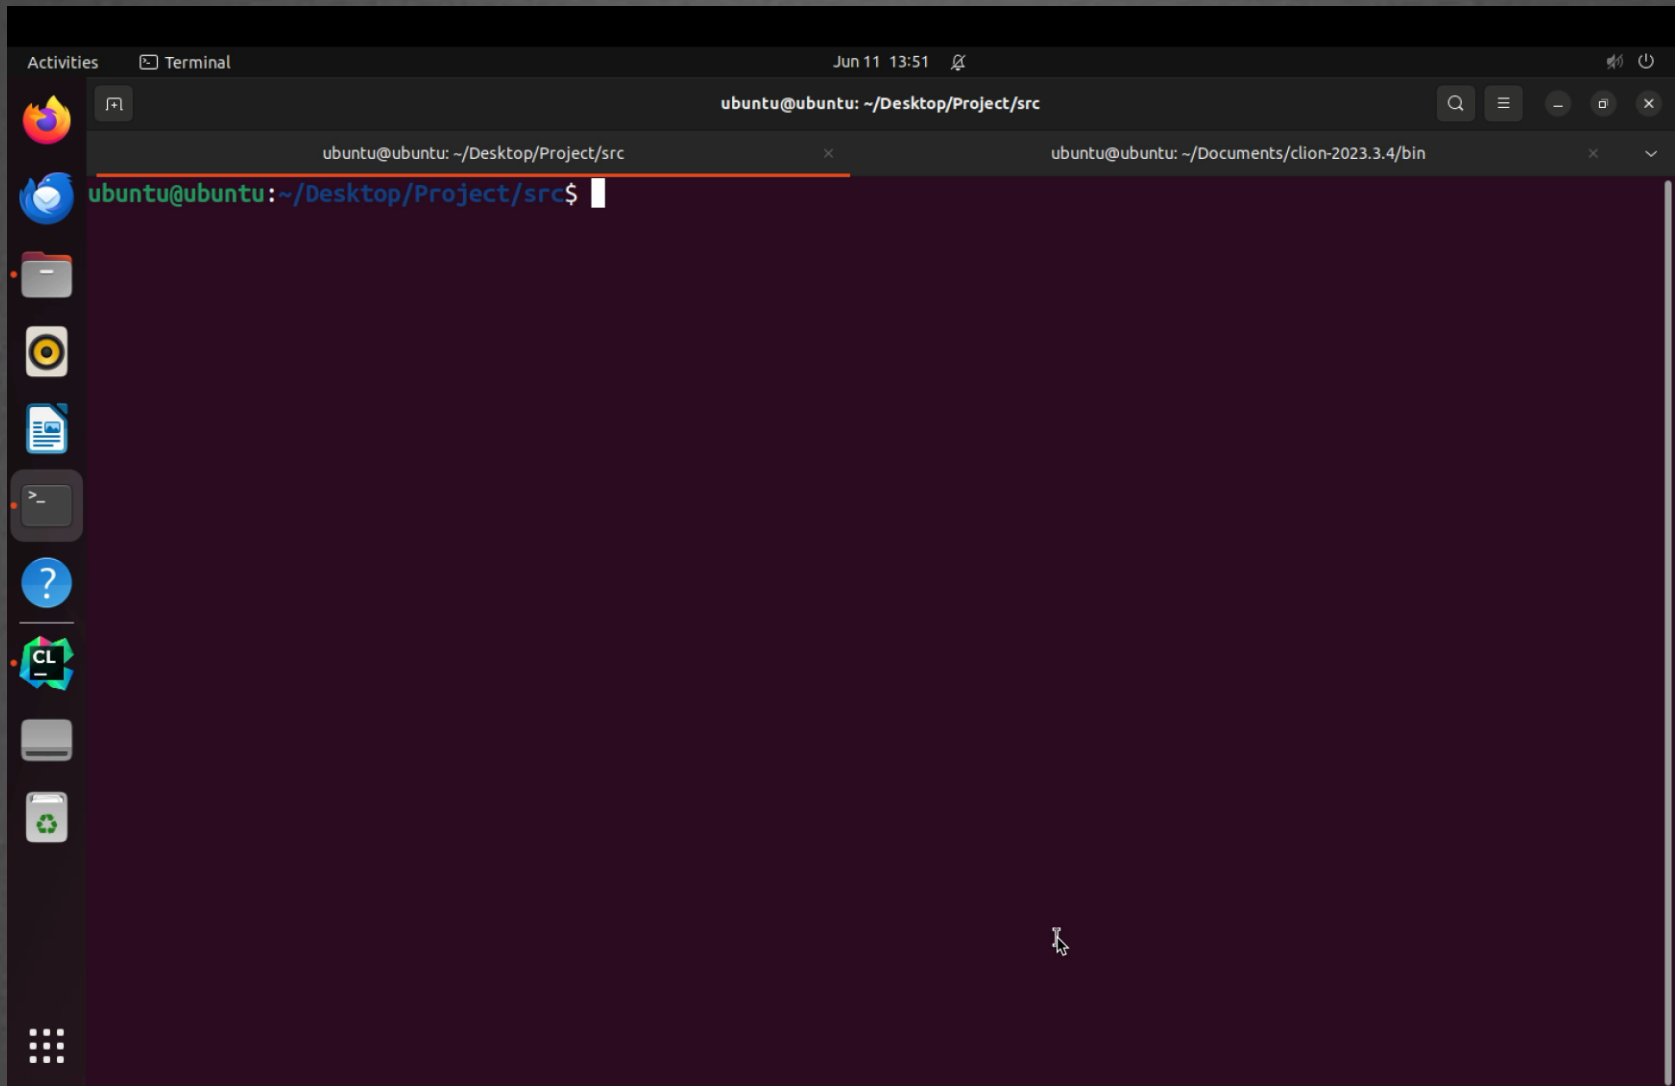

- Sorted user input
- Retrieving command's success-state

# Solution - History

- User-friendly and practical
- Doubly-linked list of input entities
- Non-Canonical terminal mode

# Solution – plot & latex

- Command to plot via Gnuplot
- Templates for LaTeX
  - Exercise sheet
  - Project report
  - CV
- Plot then integrate in LaTeX

# Discussion & Conclusion

- Achieved our goals and more
- Time-plan worked great
- Open TODO's:
  - Combining plot directly with LaTeX
  - Error handling with gnuplot
  - Memory optimization

# Lessons Learned

- System-related programming
- Project scheduling
- Third-party libraries

We thank you for your attention.
